\* Unless otherwise stated, the report covers the period 1 January 2006 to 31 December 2006. It should be borne in mind that the validity of some derogations extend over more than one calendar year, and certain figures for the taking of birds are not available. Such figures, whenever possible, will be included in the next report. Figures shown in square brackets indicate that not all the derogations returns for that species have yet been received.
