

Access to Nature Regional Targeting Plan – the South-East 10% most deprived Lower Super Output Areas

This table lists the Lower Super Output Areas (LSOA) in the South-East that are ranked as the 10% most deprived in the region, as identified through the Index of Multiple Deprivation. The table relates to Priority 1 Geographic Target Areas of the South-East Regional Targeting Plan for the Access to Nature Grant Scheme and is intended to help applicants to identify whether their proposed project addresses this priority.

A postcode search is available online to enable people to identify which LSOA a proposed project is located within. This is available at: <http://neighbourhood.statistics.gov.uk>

This table is drawn from 2004 IMD data obtained from the National Statistics office. The plans will be reviewed annually and at the next review it is likely that the updated 2007 IMD data will be used to identify the most deprived Super Output Areas in the South-East. In the meantime, where applicants are able to demonstrate that the area in which they are working is identified as deprived (ie in the top 10% most deprived LSOAs in the South-East) using the 2007 data, but not by the 2004 data, we are likely to be able to take this fact into account.

Local Authority Name	Super Output Area Name	Super Output Area Code	IMD Score	Rank within Region	Regional Deprivation Class
